MEMORANDUM FOR: Director, Near Eastern and South Asian Analysis

VIA: Deputy Director for Administration  
Deputy Director for Intelligence

FROM: John M. Ray  
Director of Logistics

SUBJECT: Request for Priority Wall Construction in  
the New Headquarters Building

REFERENCE: Memo for C/FMD, from D/NESA, dtd 6 Sept 88,  
Same Subject

STAT 1. As you may be aware, our resources in the Office of Logistics are completely strained in attempting to satisfy the immediate and outstanding space requirements in the Agency. Simultaneously, we are involved with moving people into the New Headquarters Building (NHB), as well as undergoing an extensive renovation at the 2430 E Street Complex to accommodate people who are being evacuated from [redacted] in February 1989. We are exerting extensive effort with the Backfill Renovation Program in the Original Headquarters Building, one of the objectives of which is to accommodate the Office of Imagery Analysis on the Headquarters Compound. We are also pursuing the further development of [redacted] to accommodate the Directorate of Science and Technology, among other components. Given this state of affairs, there is no way we can simultaneously make all things right in the NHB until we fully occupy same.

STAT

STAT 2. In view of the above situation, please postpone your request for renovations at least until we have completed moves into the NHB. Our planning has always been to come back through both towers in the NHB after they are occupied and make necessary modifications at that time.

[redacted]

John M. Ray
